MODERN METHODS

Years ago, field seeds were sold without brand name or test. Then merchants began branding their seeds, and quoting each brand at a different price. These early brands were not based on any definite standard, and this naturally led to confusion. The next step in advance was to quote each brand with a definite statement of Purity (for example, ORIOLE BRAND TIMOTHY, 99.60% PURE.) This logical and clean-cut arrangement has governed the seed trade for a period of years, and has proven highly acceptable to dealers. Recently, there has been a tendency to quote without test. This is a distinct reversion to the old days of confusion and uncertainty, and we wish to assure our customers that we are going to continue our regular method of quoting Brands with
